

Note: The 7812 output does not completely drop to 0V when the power is removed. This is due to the internal structure of the regulator. To ensure a clean shutdown, the power should be removed through the power switch.

Note: The 7812 output does not completely drop to 0V when the power is removed. This is due to the internal structure of the regulator. To ensure a clean shutdown, the power should be removed through the power switch.
